SAFETY NET SOLUTIONS

SAFETY NET SOLUTIONS

TSS has developed the TSS Safety Net as a result of a comprehensive study of the problems associated with the falling of objects and workers as well as risks of falling objects for the workers or members of the Public below.

Unlike similar products on the market, the TSS Safety Net has the unique ability to adapt to various building shapes,

façades, and materials, as well as cope with high wind loading, particularly in high-rise and exposed structures.

The TSS Safety Net addresses these risks on sites by absorbing the energy of the fall and containing the falling object or person within the net.

- Safety Net Fans
- Decking Beams
- Vertifan Protection Screen
- Safety Nets
- Sport and Leisure
- Alsipercha Fall Arrest System

EDGE PROTECTION SYSTEMS

EDGE PROTECTION SYSTEMS

We use a temporary edge protection system as the first line of defence to secure the open edges in construction sites and buildings to prevent the fall of workers or objects from height.

TSS edge protection system meets all necessary safety standards in this region and industry and beyond. TSS

Edge Protection systems are fully compliant with EN 13374 class A and B.

These are an important element in fall protection on sites. These openings are subject to restrictive access control measures for sub-contractors who need access to the shafts.

- Meshguard
- Shaft Gate
- Coreguard
- Ladstair

FALL PROTECTION SOLUTIONS

FALL PROTECTION SOLUTIONS

Lifeline systems are designed to be installed on steel or concrete roof-deck-wall structures. They are specially designed to reduce the forces generated at all points of a lifeline imposed on the structure by utilizing a shock absorber unit. They are designed to be used by 1-4 users depending on the type of fixing, anchors and configuration.

Lifeline systems may be used in temporary or permanent applications in horizontal, vertical, or overhead configuration. The system consists of anchorage (which may be a line or a single anchor point), connectors (which may be a trolley or runner connected to the line on one end and the user's lanyard at the other), and a body harness.

- Permanent Lifeline System
- Personal Protective Equipment
- Rescue Devices & Equipment
- Alsipercha Fall Arrest System

S-5! METAL ROOF MOUNTING SOLUTIONS

S-5! METAL ROOF MOUNTING SOLUTIONS

Since 1992, S-5! has been one of the world's leading authorities on metal roof attachment solutions. S-5!'s zero-penetration clamps attach ancillary items to standing seam and conceal-fix metal roofs, while maintaining roof integrity and warranties. S-5! solutions are engineered for a variety of applications: snow retention, fall protection and wind performance systems, satellite dishes, solar arrays,

signs/banners, light fixtures, stack/flue bracing, walkways, air conditioning, lightning protection, equipment screens, conduit, condensate lines and more. Made in the U.S.A., S-5!'s products have revolutionized the metal roofing industry and are now installed on more than 2.5 million metal roofs worldwide, including more than 6 GW of PV, providing unsurpassed strength and longevity.

- Solar Mounting
- Utility Mounting
